

KHURAM RASHEED

Senior Full Stack Developer • AI-Integrated Solutions

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 8+ years of experience delivering web and mobile products across SaaS, AI, e-commerce, booking, and event operations domains. Builds end-to-end solutions from architecture through deployment, with growing focus on AI-powered features including conversational agents, intelligent recommendation engines, and automated candidate assessment systems. Comfortable leading delivery, coordinating with stakeholders, and guiding teams through quality and release processes.

PROFESSIONAL EXPERIENCE

Senior Software Engineer (AI and Full Stack)
June 2025 – Present
SaaS IT, Dubai (Remote)

- Built a conversational AI agent in Python for an Italy-based events and customer care company, handling user queries across Facebook, Instagram, and WhatsApp about event timing, location, and logistics that previously required manual coordination.
- Designed the agent's message flow to receive queries from social media channels, interact with official event systems, collect structured event details, and deliver formatted responses back to users in real time.
- Developed the supporting web platform using Laravel and React.js, handling event management dashboards, user notifications, and admin controls.
- Built Eyelux, an end-to-end eyewear platform in Node.js and Next.js where users receive AI-powered sunglasses recommendations based on their prescription data and face shape preferences.
- Integrated AI recommendation logic into the product flow, processing prescription inputs and returning ranked product suggestions with reasoning.
- Owned full delivery across both products, from API design and database modelling to frontend implementation and deployment.

Tech: Python, OpenAI API, Laravel, React.js, Node.js, Next.js, PostgreSQL, REST APIs, AI Agents

Senior Full Stack Lead Developer
August 2023 – June 2025
Techtimize, Lahore, Pakistan

- Led engineering across multiple product teams, owning technical architecture, code quality standards, sprint planning, and delivery timelines for all active projects.
- Built Salloon.dk, a salon booking and scheduling platform for the Danish market using Next.js. Features include online appointment booking, staff scheduling, shift management, a public marketplace for discovering salons, and client history tracking.
- Designed the calendar-driven booking system with real-time availability, multi-staff support, and automated reminders to reduce no-shows.
- Built HireWithTess, an AI-powered hiring platform that automates the interview and candidate evaluation process end to end.
- Developed employer onboarding with AI job post generation: employers enter a job title and the system generates a full job description, publishes a unique URL and QR code for instant sharing.
- Built the candidate interview pipeline where applicants scan a QR code or click a link, choose video or audio mode, and answer AI-powered interview questions. Responses are automatically analysed and scored from 1 to 100.

TECHNICAL SKILLS

Backend: Ruby on Rails, Node.js, Python, Laravel, REST APIs, Microservices, Redis, RSpec, Kafka, RabbitMQ

Frontend: React, Next.js, Vue.js, Redux, TypeScript, JavaScript, HTML/CSS, Tailwind, Jest, TanStack Query

AI / ML: AI Agents, OpenAI API, LLM Integration, RAG, HumanLoop, LangChain, AI Scoring Pipelines, NLP Workflows

Mobile: React Native, Redux, App Store / Play Store Deployment, Apple Pay, Google Pay

Databases: PostgreSQL, MySQL, MongoDB, Pinecone (Vector DBs), Elasticsearch, MS SQL Server

Cloud / DevOps: AWS (S3, EC2, RDS, SQS, Lambda, EB, API Gateway), Heroku, DigitalOcean, Vercel, CI/CD, CloudFlare

Collaboration: Agile/Scrum, Jira, Trello, Asana, Slack, Technical Leadership, Code Reviews, System Design, GitHub/GitLab/Bitbucket

EDUCATION

BS in Computer Science
Punjab University of Information and Technology, Lahore, Pakistan
July 2012 – July 2016

Masters in Computer Engineering
ISCTE - Instituto Universitário de Lisboa, Lisbon, Portugal
In Progress

- Created the employer dashboard featuring reel-based candidate browsing, AI-generated breakdowns of each candidate's strengths and weaknesses (confidence, clarity, communication, fit), and one-click interview invitations.
- Built Petrostations.com, a petroleum retail marketplace connecting buyers, sellers, and gas station owners with features including station discovery, real-time pricing, digital payments, subscription-based fuel sales, and fraud reduction for unattended stations.
- Delivered both buyer and seller mobile applications for Petrostations to App Store and Play Store, with secure payment processing, order tracking, and station management capabilities.

Tech: Next.js, React, React Native, Node.js, TypeScript, OpenAI API, PostgreSQL, AI Scoring, QR Code Generation, Vercel

Technical Consultant / Full Stack Lead December 2021 – August 2023 Viral Square, Lahore, Pakistan

- Owned architecture and delivery of multiple web and mobile products, collaborating directly with clients and stakeholders on requirements, scope, and technical direction.
- Delivered a React-based custom golf bag designer plugin enabling customers to configure personalized products and place orders directly, contributing to measurable sales growth.
- Improved production performance by optimizing frontend rendering paths, backend query patterns, and caching strategy across multiple client platforms.
- Built a React Native mobile application for security guard booking and event staffing, covering real-time allocation, shift scheduling, and on-site check-in tracking for large-scale events.
- Built HippoPulse, a React Native mobile app for real estate agencies that tracks agent movements in real time using GPS, displays goal progress and performance stats, and provides managers with interactive charts and analytics dashboards to monitor team output and closing rates.
- Shipped all mobile applications to App Store and Play Store with JWT-based authentication, subscription flows, push notifications, and release management.
- Designed and shipped API platforms using Ruby on Rails and Node.js serving both web and mobile clients.
- Introduced structured React testing (unit, integration, snapshot) with Jest and raised code review standards across engagements.

Tech: Ruby on Rails, Node.js, React, Next.js, React Native, TypeScript, PostgreSQL, MySQL, MongoDB, Redis, Jest, RSpec, AWS, Heroku, DigitalOcean

Full Stack Developer August 2018 – December 2021 Viral Square, Lahore, Pakistan

- Led delivery across web and mobile projects, improving throughput through clearer requirement breakdown and sprint execution planning.
- Introduced Git workflow standards (branch naming conventions, PR review process), improving release stability and reducing merge conflicts.
- Strengthened backend quality by building out RSpec test coverage across Rails applications, reducing production bug frequency.
- Started and scaled a React Native initiative within the team, expanding the company's mobile delivery capability.
- Shipped mobile apps to App Store and Play Store with subscription tracking and payment flows including Apple Pay and Google Pay.
- Automated scheduling and operations for service businesses through calendar-driven staff allocation workflows.

Tech: Ruby on Rails, React, React Native, Redux, PostgreSQL, Redis, RSpec, CI/CD, App Store / Play Store

Junior Full Stack Developer August 2016 – July 2018 Engin Technologies, Lahore, Pakistan

— PROJECTS

- **Petrostations** — Fuel marketplace connecting buyers, sellers & station owners; owned architecture through mobile app delivery (App Store & Play Store).
- **Salloon.dk** — Salon booking & scheduling platform for the Danish market; built the calendar-driven, multi-staff booking engine.
- **Eyelux** — AI-powered eyewear recommendation platform based on prescription data and face-shape preferences.
- **Lawmatics** — Legal CRM & client-intake growth platform for law firms.
- **CuddleClones** — E-commerce platform for custom pet plush replicas made from customer photos.
- **DigLocal** — Local discovery app connecting users to independent businesses and events.
- **Dragonboat** — AI-powered product portfolio & roadmapping platform for product teams.

- Customized Spree e-commerce features and added test coverage, saving development time through reusable component patterns and more stable releases.
- Built a nutrition-focused platform using Node.js and React Redux, integrating nutrition algorithm APIs to deliver personalized meal recommendations.
- Delivered a meal evaluation workflow that improved the user experience and contributed to higher subscription retention.

Tech: Ruby on Rails, Spree, Node.js, React, Redux, PostgreSQL, MySQL, REST APIs, Git
